

Gun violence is now the THIRD leading cause of death for kids in America.

For too long, lawmakers have ignored calls for gun law reform.

We reject that narrative. We say ENOUGH.

We believe that students can advocate for policies that will reduce the number of people injured and killed by gun violence. We believe that the answer to gun violence is not more guns for more people to carry more places. We believe in facts, data, and evidenced-based research.

We believe that if the leaders won't lead, we will. And, we believe that if the leaders won't listen to the people, we will organize, mobilize and vote them out.

But, to do so, we need **YOU**, the students to **GET INVOLVED!**
